FULL STACK ENGINEER

647-985-3217 | magedhennawy@gmail.com

Full stack engineer with 7 years of experience building enterprise software, with a background in healthcare. Proficient in all stages of the software development cycle, from concept to delivery. Expertise in front-end SPA and back-end API development, utilizing a diverse set of technologies. Excellent problem-solving and communication skills, adept at collaborating with cross-functional teams to drive project success and dedicated to delivering robust solutions for optimal user experience.

Experience

JAN 2025– PRESENT

Full Stack Engineer / Royal Canadian Air Force, Ottawa (Remote)

- Took ownership of a mission-critical scheduling platform supporting flight operations, drop-offs, and shift coverage; led end-to-end delivery from system design to deployment, significantly improving operational coordination.
- Led the architecture and rollout of a domain-based authentication system integrated with Microsoft Entra ID, incorporating Redis-backed session management and real-time socket updates.
- Designed and optimized scalable cloud infrastructure on AWS, including ECS (Fargate), ALB, Route 53, and CloudWatch; implemented secure and efficient CI/CD pipelines using Docker, Sequelize, and custom health checks to resolve 504 Gateway Timeouts and support zero-downtime deployments.
- Guided cross-functional collaboration with designers and operations teams to implement a user-centric UI/UX for dynamic scheduling workflows, ensuring alignment with real-world military logistics needs.

Technologies: Vue.js / TypeScript / Node.js / Express / Axios / PostgreSQL / AWS Athena / AWS Redshift / AWS S3 / Redis / Jest

DEC 2021– JAN 2024

Full Stack Engineer / Clarify Health, San Francisco (Remote)

- Built extensible data components within plug and play custom framework for customer success teams to configure for clients.
- Focused on backend development with Node.js, crafting scalable API endpoints capable of handling over 10,000 requests per minute while maintaining a 99.99% uptime. Integrated these APIs with PostgreSQL databases to ensure data exchange between the frontend and backend.
- Developed comprehensive documentation for the UX/UI library and API services, which reduced the onboarding time for new developers by 40%. Documentation fostered better adherence to development best practices and coding standards.

Technologies: Angular / RxJs / Node.js / Express / Loopback / PostgreSQL / AWS Athena / AWS Redshift / AWS S3 / Redis / Highcharts

JAN 2020– DEC 2021

Senior Angular Developer - Lead Developer / RBC, Toronto

- Led the integration of third-party APIs and microservices with the Node.js backend, facilitating seamless data exchange and expanding the functionality.
- Developed UI/UX library for RBC using Vue.js, Angular, and React, which became a key tool for creating consistent user experiences across all RBC web products. This system allowed development teams to focus on product innovation
- Implemented globalization and localization for the UI components, enabling them to be used by users with disabilities and international customers. This inclusion increased the library's adoption by 30%, enhancing RBC's global reach.
- Contributed to backend systems' continuous improvement, advocating for best practices in code quality, security, and performance.
- Delivered a more inclusive digital banking experience. Promoted design and accessibility best practices, ensuring compliance with industry standards like WCAG, enhancing accessibility for users with disabilities.

Technologies: Angular / React.js / VueJs / TypeScript / NgRx / Bootstrap / ASP.NET Core (C#/VB), Dapper, Swagger, MS SQL Server

MAY 2017 – JAN 2020

Software Developer / IBM, Markham

- Developed the UI/UX library for Watson Business Unit and started the open-source IBM Carbon component library in Angular. With 28,000+ downloads, it gained wide adoption both within IBM and in the broader developer community.
- Collaborated with designers and developers to implement and perfect the usage and styling of UI components, ensuring visual consistency and ease of use across Watson products.
- Implemented globalization and localization, improving IBM's accessibility and global reach by ensuring components were user-friendly for individuals with disabilities and international users. This effort expanded user base and compliance with international standards.

Technologies: Angular / TypeScript / NgRx / Bootstrap / ASP.NET Core (C#/VB) / Storybook / Jasmine / Jest

Education

Honours Bachelor of Science, Software Engineering / University of Toronto

Advanced ReactJs / META @ Coursera

Projects

- **Personal Small Business - Jinx Employee Payroll/Scheduling App.** Jan 2024 - Present
 - React (with TypeScript), Next.js, Node.js, PostgreSQL, Tailwind CSS, and Axios for the full-stack development. Implemented features for: Real-time tracking of employee hours. As well as Automatic payroll calculation based on hours worked.
- **Active Code Owner/Reviewer**
 - [Carbon Components Angular](#) - Responsible for maintaining and reviewing code for the open-source UI library. Ensured high code quality and feature enhancements to support Angular-based projects.

Skills

Front-end: TypeScript, JavaScript, Angular, ReactJs, VueJs, Lodash, Mapbox, Highcharts, Bootstrap, jQuery, HTML5, SCSS
Back-end/Database: Node.js, Express, Loopback, .NET Core, Mongoose, PostgreSQL, MS SQL Server, MongoDB
Workflow: VS Code, Git, GitHub, NPM, Azure DevOps, Circle CI, Jasmine, Karma, Enzyme, Jest, Mocha, Chai
Leadership: McKinsey & Company: Leadership Essentials Program – October 2023
